REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record teaches a phoretic cell comprising a liquid crystal cell having a liquid crystal material and a phoretic particle therein, the phoretic particle being moveable from a first preferred position at a first side of the liquid crystal cell to a second side of the liquid crystal cell on application of a field. The prior art of record does not teach nor suggest, in combination with the limitations supra, the liquid crystal cell being adapted such that, when the phoretic particle is not located at the first preferred position, there is a defect associated with the first preferred position and the liquid crystal defect energy of said defect is lower when the phoretic particle is located substantially at the first preferred position within the liquid crystal cell than when the phoretic particle is not so located.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
